RACHEL & ADAM

Rachel and Adam's family is clearly outgrowing their home. They bought it seven years ago, shortly after having their first child, and now they have four children in two bedrooms, with their three boys all bunking in the same room. Adam loves the neighborhood and proximity to work but Rachel wants a home with more function that better fits their family. Hilary hunts for function and hidden space for a couple with four kids, while David searches for the home of their dreams with room to spare.
