STEVE & THERESA

Steve and Theresa purchased a large, private lot and custom built their dream home together. Over time the couple realized that the home was no longer functioning for them, but overlooked it as they focused on raising their family. Eighteen years later the couple's children will soon be off to college and Steve and Theresa both agree certain things don't work in the house. Steve loves the home he helped build and is ready to make the home perfect by addressing Theresa's biggest complaints, the kitchen and master bathroom. Theresa has much bigger problems with the house overall. She'd rather find a home that is better suited for guests and allow them to age in place. Plus, she is ready to live closer to her work and social life, in a smaller house near downtown where they don't have thousands of square feet and 6 acres to care for. While Theresa can't envision a future here, Steve is determined to find a way to help Theresa fall back in love with their dream home.
